

Computer Based Training Module

Basic Governing and Control Theory (8928-358)

- Self Paced
- Interactive
- Videos
- Animations
- Quizzes
- Reference Materials
- Excellent Review

DESCRIPTION

Woodward has developed a "**Basic Governing and Control Theory**" Computer Based Training (CBT) module on CD-ROM. The CBT includes videos, animations, reviews, and quizzes to illustrate and reinforce basic concepts and control system functions. The CBT takes approximately four hours to complete, and once completed, provides an excellent source of reference material.

The CBT uses a variety of presentation modes to enhance and enforce the learning experience. Visual representation of each topic is displayed along with text explaining each point. Videos and animations are then used to activate functions and in some cases, allow hands-on interaction between the CBT and the user.

CBTs offer a wide range of advantages. A CBT module has no instructor, doesn't need a classroom, and doesn't require support people to help schedule and process the training class. There are no waiting lists to get into the class, and a class does not need to be scheduled for new hires. The CBT can be offered at any time and at any location as long as a PC is available. The flexibility and convenience of the CBT allow for a "Just in Time" and "Just Enough" training experience.

MINIMUM SYSTEM REQUIREMENTS

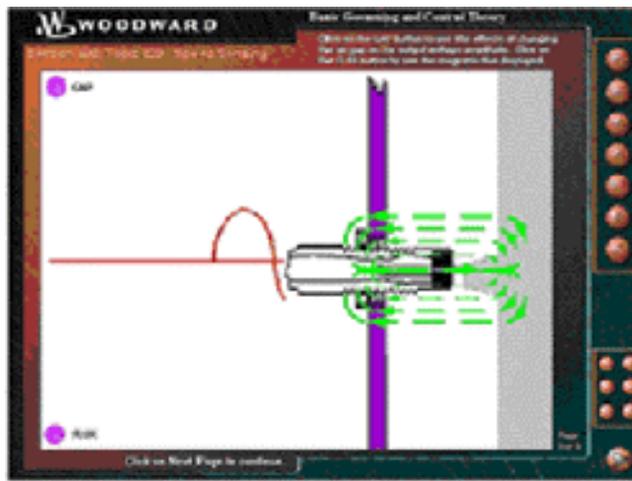

- Pentium 100 MHz or faster processor
- CD-ROM Drive
- Resolution: 800 x 600
- 16-bit color
- Windows 95/NT or higher

PO Box 1519
Fort Collins CO, USA
80522-1519
1000 East Drake Road
Fort Collins CO 80525

Animations

Animations used in the CBT demonstrate principles that are not easily taught with static pictures. As in the animation of the magnetic pickup shown above, interactive icons allow the student to control the flow of the animation. Students can spend as much time as needed with each portion of the training demonstration, and then move on to the next topic. Every effort has been made to make this an enjoyable learning experience.

Quizzes

Reviews and quizzes are used to re-enforce learning and highlight key points. True/false, multiple choice, and other interactive tools are introduced to make sure students understand key information before they continue. This CBT is a great way to review governing fundamentals. Contact Woodward or your Woodward authorized Distributor to order (part number 8928-358).
