

Mechatronic Technician

Peaker Services, Inc. is searching for mechatronic technicians, who are dedicated to serving customers and willing to learn engine and turbine fuel control systems. As part of our team, you will work on various types of governors and actuators used on high horsepower engines and turbines in power generation, marine, and locomotive applications. Mechatronic technicians apply the principles of mechanics, electricity, electronics, and hydraulics to perform troubleshooting, field repairs, rebuilds, and make technical decisions. The ability to communicate with the customers on-site throughout process as well as perform follow-up services is a must. Shop work includes a high attention to detail and processes such as: disassembly, cleaning, inspection, assembly, machining, general fabrication, wiring, testing, calibration and reading technical documents. **Some travel may be required on short notice.**

Job type: Full-time, Day shift

Education: High-school or equivalent

Salary: Negotiable based upon experience + competitive benefits

Experience: All experience levels, including entry-level + willing to train

Required Qualifications:

- Experience with basic mechanical and electrical measurement tools
- Demonstrates strong attention to detail and process methods
- Demonstrates the ability to troubleshoot mechanical, electrical and digital systems
- Demonstrates the ability to machine parts or the capability to learn
- Demonstrates the ability to work in a team
- Employee provides own work tools (company partial payroll deduction for specialty tools)
- Willing to learn, read, interpret, and work from mechanical and electrical blueprints/schematics.
- Valid driver's license with clean driving record.
- Able to lift 60lbs.
- Willing to travel up to 25% of the time

Preferred:

- Experience with technician's instruments and tools, both mechanical and electrical.
- Experience reading, understanding, and working from technical manuals, mechanical and electrical blueprints/schematics.

Benefits:

- Excellent compensation based on experience level
- BCBS medical, vision, and dental insurance
- Vacation, personal, and sick pay
- 401K after first month, employer contributions after 1 year
- ESOP involvement after 1 year of service
- Travel, food, and accommodation paid expenses
- Paid partial tooling cost, payroll deducted

Peaker Services, Inc. modernizes and services industrial engines, turbines, and compressors in power, marine, industrial, and rail applications. Through a systems approach we digitize and mechanically modify, repair, and overhaul your equipment to optimize efficiency and performance, simplify operation and maintenance, and increase reliability and safety.
